EDUCATION

Dr. A.P.J Abdul Kalam Technical University

Bachelor of Technology (Computer Science, Minor in Data Science)

Lucknow, India

Aug. 2024 – May 2028

EXPERIENCE

Thiranex

Data Science Intern

Remote

May 2026 – June 2026

- Worked on a real-world finance analytics project involving stock market data analysis and prediction.
- Performed data preprocessing, feature engineering, and exploratory data analysis on financial datasets.
- Built machine learning models for stock price forecasting and trend analysis.
- Created visualizations and reports to communicate insights and support decision-making.

GirlScript Summer of Code (GSSoC)

Open Source Contributor

Remote

May 2026 – June 2026

- Contributing to open-source projects by resolving issues, implementing features, and improving project documentation.
- Collaborating with mentors and developers through Git and GitHub workflows, including pull requests and code reviews.
- Working on real-world software projects while following industry-standard development practices.
- Enhancing skills in software engineering, version control, debugging, and collaborative development.

TECHNICAL SKILLS

- Languages:** C, Python, JavaScript, HTML/CSS, Rust (Performance Logic)
- Libraries & Frameworks:** NumPy, pandas, Matplotlib, React.js, Node.js, Tailwind CSS
- Developer Tools:** Git/GitHub, Linux/Bash, VS Code, Kaggle, JupyterNotebook, Vite
- Core Concepts:** Data Structures and Algorithms (DSA), Machine Learning, Statistics, REST APIs

PROJECTS

StockPulse | Python, Pandas, NumPy, Matplotlib, Scikit-learn

[GitHub Link](#)

- Developed a stock market analytics and prediction system using machine learning techniques.
- Performed data cleaning, feature engineering, and exploratory data analysis on historical stock market datasets.
- Built predictive models to forecast stock price movements and identify market trends.
- Created interactive visualizations and performance reports to support investment analysis.

Student Placement Prediction System | Python, Pandas, NumPy, Scikit-learn, Matplotlib

[GitHub Link](#)

- Developed a machine learning model to predict student placement outcomes based on academic and skill-related factors.
- Performed data preprocessing, feature engineering, and exploratory data analysis on placement datasets.
- Trained and evaluated multiple classification algorithms to improve prediction accuracy and model reliability.
- Visualized placement trends and key influencing factors using data visualization techniques.

PhishShield | React, Rust, JavaScript, HTML/CSS

[GitHub Link](#)

- Architected a client-side AI phishing detection tool using Rust for high-performance URL and IP address analysis.
- Optimized for zero-latency feedback and 100% user privacy by executing all logic locally on the browser.
- Implemented modern frontend techniques to improve detection accuracy and enhance internet safety for everyday users.

CERTIFICATIONS

- Google AI Certification:** Certified in foundational Artificial Intelligence and Machine Learning principles.
- Capstone Project:** Developed a capstone project as part of a 5-day intensive AI training program by Google.
- CodeChef DSA Certification:** Validated expertise in complex algorithmic problem-solving and efficiency.
